REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 3, 6, 9 and 17, the prior arts fail to teach or fairly suggest a method or system for interconnecting transfer mode system having a calling party host and a called party asynchronous transfer mode system having a called party host using an intermediate switching asynchronous transfer mode network and a border node associated with each asynchronous transfer mode system comprising a routing step that comprises:

substituting at the border node of the calling party asynchronous transfer mode system in a called party address information element an intermediate switching asynchronous transfer mode network address of the border node of the called party asynchronous transfer mode system for the asynchronous transfer mode system address of the called party host; and

routing a call over the intermediate switching asynchronous transfer mode network from the border node of the calling party asynchronous transfer mode system to the border node of the called party asynchronous transfer mode system based on the intermediate switching asynchronous transfer mode network address in the called party address information element, in combination with other limitations as specified in the independent claims 1, 3, 6, 9 and 17.

Conclusion
